Spicer[®] Lists Products with Mercedes-Benz Applications in Web Catalog

It is now possible for Spicer[®] customers to search its product offerings for Mercedes-Benz vehicles, as the brand is in the process of referencing those parts in its web catalog. So far, there are approximately 1,000 part numbers listed for Mercedes-Benz applications, and more are being added each day.

The Spicer products include complete driveshafts, U-joints, center bearings, flange yokes and other components for light commercial vehicles, trucks and busses. Many of these parts were already available in the web catalog, but were not cross-referenced with Mercedes part numbers, while others were developed specifically for the international aftermarket.

“Spicer is proud to manufacture parts that are OE-quality in the aftermarket using our extremely rigorous standards,” said Guido Reiter, driveshaft product manager, Dana Incorporated Aftermarket Group. “Mercedes-Benz is a large and well-respected brand, and we are pleased to make it easier for our customers to find world-class parts through our growing online catalog.”

Spicer is constantly working to improve the functionality of its web catalog, which the listing of the Mercedes-Benz products represents. In addition, the brand is continually increasing the number of products available to its customers.

To see the updated Spicer web catalog, go to: <http://spicerparts.com/online-catalog>. For a full list of the parts available, please click on the PDF.
